

Augmented Reality Gardening App

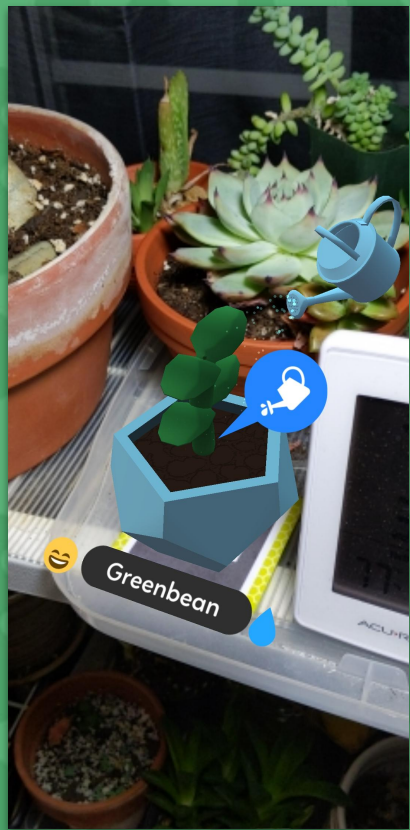

What's gARden?

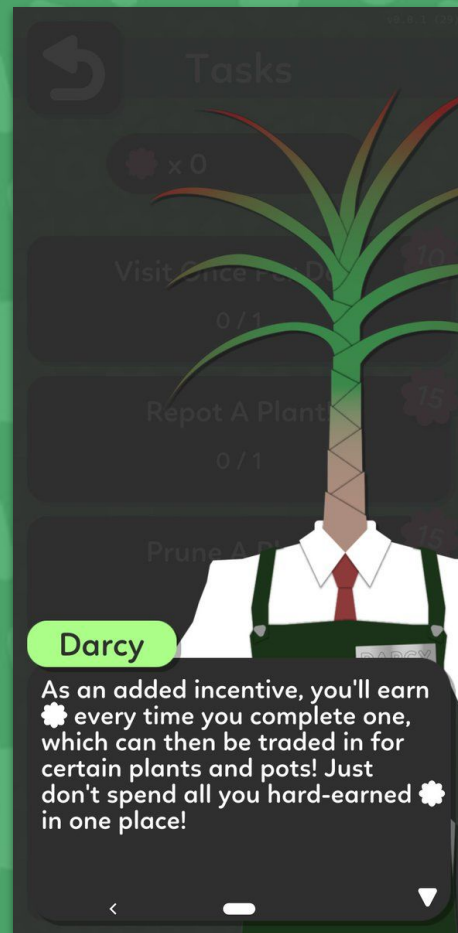

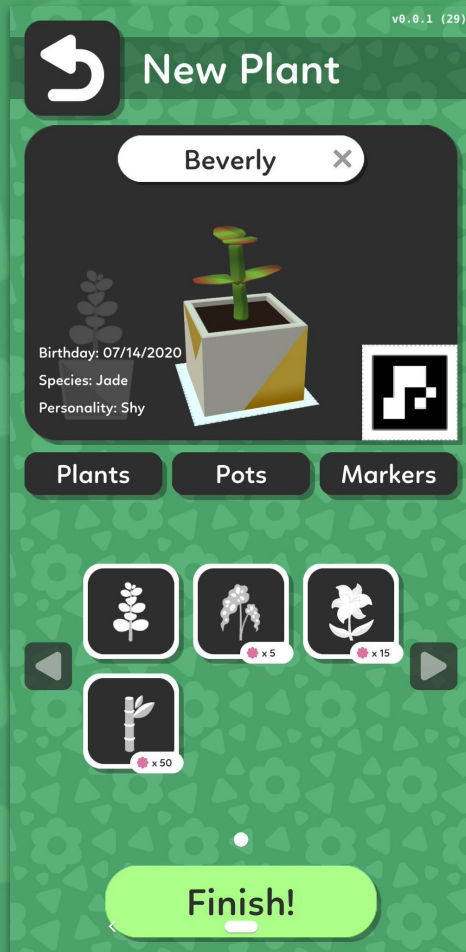

- **Augmented Reality** gardening application
- Choose your favorite plant species and pottery
 - Marker pattern representing plant is generated
- Print out **physical markers** that act as “flowerpots”
 - View marker through app to **bring it to life!**
 - Tap plants to interact
- Tend to plants to **speed their growth**
 - Plants grow in **real time**
 - Can **never die**, only grow more slowly

Core Features

- Physically-based AR Markers to print
 - Allow you **decorate** your real-world space!
 - Get creative with arts and crafts!
- Persistent, **real-time** plant growth
 - **Procedurally generated** growth patterns
 - Water, repot, and prune your plant to **keep it happy!**
- Built-in **photo tool**
 - Share photos to **social media!**

Player Experience Goals

- Yield a **mindful** and **meditative** experience
 - More of a **toy** than a game!
 - Limited (if any) microtransactions
- **Casual** player audience
 - Low stress
 - Low maintenance
 - Short play intervals
 - **Older**-skewing demographic

Planned Release

- 2021, we hope!
- Targeting both iOS and Android platforms

About Sunshine Committee

- The Sunshine Committee is **Tom Farro** and **Kelly Zhang**
- Assembled in early 2016 following a successful run at the MassDiGI Game Pitch Challenge that February
- We enjoy working on artisanal, handcrafted video games!
